FIAMO

Dr. Bhawisha and Dr. Shachindra Joshi

have been in the field of Homoeopathy for the past 25 yrs. Both of them graduated at a young age of 23 and since then have been actively involved with the science.

As holders of M.D. degrees in Homeopathic Medicine & Surgery, they have not only practiced but also refined the science of homeopathy with their mantra of helping people. They are the creators of the 'MAP system of Homeopathy'.

They have a busy practice in the city of Mumbai, India for the past 25 years. With patients from all across the world consulting them for their complaints. Colleagues from across the world refer difficult cases to them.

Their special interest involves treating cases with auto immune disorders, autism, allergies, cancer and children's complaints.

As young doctors learning the art they always believed in simplifying complex issues. Coming to right remedies can be a daunting task, they constantly worked on simplifying this for themselves.

This desire to simplify complex subjects and combined with the desire to reach out introduced them to the world of international teaching at the age of 26 yrs.

Their teachings & seminars are globally popular and attended by many homeopathic colleagues.

They have conducted over a hundred seminars worldwide in the past two decades, popularizing their innovative MAP system of homeopathy. This system is not just a methodology but a philosophy that empowers homeopaths to discover the 'Master' within themselves, fostering a community of self-reliant practitioners.

During the covid epidemic the doctors have successfully treated hundreds of cases exclusively with Homoeopathy in India and different parts of the world.

They have self-published nine insightful books on Homeopathy. Their latest work, 'The System of MAP & Birds in Homeopathy,' encapsulates their entire methodology, offering readers a comprehensive guide to their approach. Through their teachings, writings, and practice, Dr. Bhawisha and Dr. Shachindra Joshi continue to illuminate the path of homeopathic healing, education, and self-empowerment. Their contributions to the field are not just a reflection of their expertise but also their profound dedication to the betterment of humanity through the gentle art of Homoeopathy.

The MAP is ever growing, evolving, refining system where the Master is in each one of us.
